

Shelf list of the library of Richard Towneley (1629-1707) around 1686

This is a transcript of the first 46 pages of a manuscript catalogue Mun. A.2.67 in Chetham's Library, Manchester. It was purchased by James Crossley, first president of the Chetham Society, when the contents of Towneley Library was auctioned by Sotheby's in June 1883.

The manuscript contains the earliest known catalogue of the Towneley Library and the first part records a shelf list for the library early in the reign of King James II. The aim here is to provide a searchable text of the shelf list.

The Towneley shelf list covers 1379 books on 74 shelves containing between 8 and 35 books per shelf. This part of the manuscript is written clearly with very few corrections and most entries include year of publication and many also show where published. The rest of the manuscript has 72 pages of a catalogue organized into seven categories - 'Scriptures, Fathers & Divines', 'Controvertists', 'Historians', 'Philosophers', 'Mathematicians', 'Lawyers' and 'Miscelanies and Poets'. Each category is ordered roughly by book size from folios downwards. These pages include an additional 600 books that have no shelf mark. None of these entries include any publication details. The second part of the manuscript has many more deletions and appears to be a draft for a subsequent alphabetical catalogue [English MS 735, The John Rylands University Library, The University of Manchester]. A companion searchable transcript of the alphabetical catalogue has been produced.

Textual amendments have been kept to minimum with the titles kept as originally written including any idiosyncratic spellings. In a small number of cases an entry has been overwritten. Here those parts of an entry crossed out have been omitted, the aim being clarity as to which title was finally assigned a particular shelf mark. The transcript of the first 46 pages of Chetham Library Mun. A.2.67 "A Catalogue of the Books in this Library of Towneley" now follows.
