

## **Alphabetical catalogue of the library of Richard Towneley (1629-1707) around 1707**

This is an edited transcript of manuscript catalogue English MS375 in John Rylands University Library in Manchester. It is a companion to a transcript of an earlier catalogue of the Towneley Library now in Chetham's Library, Manchester, but was not part of the contents auctioned by Sotheby's in June 1883. It was probably retained by the 7th Earl of Abingdon (1836-1928) in 1883 and was accessioned in the John Rylands Library during the period 1928-1935.

The manuscript provides an alphabetic index of book titles and authors in the Towneley Library. As with the earlier catalogue, the books are organised into seven categories - 'Scriptures', 'Fathers & Divines', 'Controvertists', 'Historians', 'Philosophers', 'Mathematicians', 'Lawyers' and 'Miscellanies and Poets'. One major difference is the replacement of the old shelf mark by an identifier based upon each book's height (+/- half inch from 16" [A] , 15½" [B] to 4½" [Z] and 4" [&]) together with a serial number. This new identifier was added to those books already containing the old shelf mark, as can be seen in many of the books with Towneley provenance now dispersed across the world.

It contains over 100 additional titles but there were also a number of losses from the earlier catalogue so the total number of titles is a little under 2,000. The manuscript was a working document with numerous corrections over a period of time. This is best shown by several instances of renumbering required when several pamphlets were combined under one cover. The layout of the manuscript uses two narrow columns for book height in inches and a serial number, followed by a wide column for the book title / author with another two narrow columns for identifier and serial number. The identifier : serial number has, in most cases, also been written in the central column, presumably as part of a validation process.

As with the shelf list transcript, textual amendments have been kept to minimum with the titles kept as originally written including any idiosyncratic spellings. Again those parts of an entry crossed out have been omitted, the aim being clarity as to which title was finally assigned a particular identifier. The other main editorial decision has been to omit the duplicate recording of the identifier : serial number and to add it only once in a single column on the right of the title.

A transcript of 81 pages of "An Alphabetical Catalogue of the Books in the Library at Towneley" now follows.

Scriptures, Fathers and Divines
